

Our Partners

Apexus

One of AIMM's earliest and most steadfast partners is Apexus, the non-profit contractor that works with more than 29,000 health care providers across the U.S. to lower their costs for purchasing outpatient pharmaceutical products, allowing them to stretch their resources to serve more low-income and uninsured patients. As the exclusive contractor for the 340B Drug Pricing Program, managed by the Health Resources and Service Administration (HRSA), Apexus negotiates significant discounts for branded and generic pharmaceuticals while working with providers to help them comply with 340B regulations and guidance. Apexus works closely with HRSA's Office of Pharmacy Affairs to improve the integrity of the 340B program.

The 340B program was the common ground initially for Apexus and AIMM, and while many teams still have a 340B connection, the work of Apexus complements AIMM's goals, and the 340B entities Apexus serves are central to the entire collaborative process since they are the ones serving the safety-net providers; they can benefit from the collaborative approach; and that ultimately benefits the community. Apexus continues to play an active role in supporting AIMM and its initiatives. Most recently, Apexus provided support to 50 340B Prime Vendor partner organizations to participate in the AIMM Collaborative.

Cardinal Health Foundation

Headquartered in Dublin, OH, Cardinal Health, Inc. helps pharmacies, hospitals, ambulatory surgery centers and physician offices focus on patient care while reducing costs, improving efficiency and quality, and increasing profitability. The Cardinal Health Foundation (CHF) supports local, national and international programs that improve health care quality and build healthy communities. CHF also offers grants to encourage employee service to the community and works through international agencies to donate much-needed medical supplies and funding to those who need them in times of disaster.

AIMM has been the recipient of a number of grants from the Cardinal Health Foundation to support the interprofessional health care teams participating in the collaborative. Cardinal Health Foundation's support has made it possible for collaborative teams to attend in-person training programs administered by the Institute for Healthcare Improvement. Additional support has contributed to AIMM's operations in order to ensure high-tough team support through leading faculty and management team members.

Empire Health Foundation

Empire Health Foundation is a private health conversion foundation headquartered in Spokane, WA that invests in ideas and organizations that improve access, education, research and policy to result in a measurably healthier region. Empire's vision is to transform Eastern Washington into the state's healthiest region, and every investment goes toward creating measurable, sustainable health improvements in four focus areas: improving health outcomes; strengthening health systems; growing physician supply; and building non-profit capacity. Through innovative public-private collaborations and a commitment to measurable health improvements, Empire Health Foundation continues to build on the impact achieved with partners both in the community and across the state.

Hemophilia Alliance

The Hemophilia Alliance is a not-for-profit organization that comprises hemophilia treatment centers (HTCs) that either have, or are seeking to have, factor delivery programs under Section 340B of the Public Health Service Act. The Alliance serves to promote the common interests of these HTCs and through its mission provide member HTCs with resources and services to sustain the Comprehensive Care Model for individuals with bleeding and clotting disorders. A strong synergy between the Alliance and AIMM is to support the care delivery of a Comprehensive Care Model that incorporate medication management. AIMM has received operational grant support from the Alliance to help all health care organizations, including HTCs develop medication management services that will impact all patients.
